

In refeerance to the NAB's petition 04-160. It has come to my attention that once again a superior product is being attatked by the competition in an effort to keep from losing marketshare. I pay for Xm radio and its content. I pay for it because I choose to and i choose to because its content and lack of worthless commercials is far superior to anything on standard radio. I urge you to place this petition where it belongs, in the trash, and let this medium continue to evolve and benifit all of us.

Sincerely

Ted Sparling.
